(70 IN. L.L., 85.71 GAL/IN., 96 IN. MAx. DEPTH OF BURY;

TANK DIMENSIONS = 220 IN. L x 80 IN. W x 70 IN. H)

Product File No: 20130334

The specifications and/or plans for this plumbing product have been reviewed and determined to be in compliance with chapters SPS 382 through 384, Wisconsin Administrative Code, and Chapters 145 and 160, Wisconsin Statutes.

The Department hereby issues an approval based on the Wisconsin Statutes and the Wisconsin Administrative Code. This approval is valid until the end of November 2018.

This approval supersedes the approval issued on 5/25/2010 under product file number 20090202.

This approval letter shall be incorporated with your previously approved plans and/or specifications approved under product file number 20090202.

This approval is contingent upon compliance with the following stipulation(s):

- This product is approved to use a department approved effluent filter installed in accordance with the product approval for the filter including a properly sized and located access opening for service and maintenance.
- This tank must be designed to withstand the pressures to which it will be subjected.
- The manufacturer must keep at the manufacturing plant a set of plans and specifications bearing the department's stamp of approval. The plans and specifications must be open to inspection by an authorized representative of the department.
- When this product has an effluent filter installed in an interior wall, the space between the top of the interior wall
  and bottom of the tank's cover must be sealed with a material that will withstand the environment in the tank and
  in a manor that will prevent waste from passing over the interior wall.
- When this product receives wastewater from dwellings and is used as a septic tank, it will produce an effluent
  quality with a maximum monthly average value for BOD5 greater than 30 mg/L but less than or equal to 220
  mg/L, TSS greater than 30 mg/L but less than or equal to 150 mg/L and F.O.G. less than or equal to 30 mg/L.
- When the optional side inlets and/or outlets located along the side of the tank within 21 inches of the outside
  corner of the tank are used in this product as a septic tank, the inlet and outlet may not be located at the same
  end of the tank.

Product File No: 20130334

- The following is approved for this product:
  - Dual inlets at end of tank with one access opening above both inlets.
  - Dual inlets at end of tank with an access opening above each inlet.
  - Optional dual outlets at end of tank with one access opening above each outlet.
  - Pipe materials constructed in conformance with Table SPS 384.30-2 or 384.30-11, Wis. Admin. Code poured into tank cover or access cover.
  - Department approved effluent filter installed in accordance with the product approval for the filter including a properly sized and located access opening for service and maintenance.
  - Two inch schedule 40 PVC cast in riser for electrical wiring.
  - Low end and side pipe openings for pump, siphon and holding tanks.
  - Top inlet opening for holding, pump, or siphon tanks.
  - Six inch inlet and outlet openings.
  - ADS N-12 Prolink Pipe as a manhole riser and cover using an ADS coupler to join manhole riser sections together.
  - Zoeller Pump Co. Septic Tank Outlet Filter and Polylok Septic Tank Outlet Filter Model No. P1-122.
  - Inlet and/or outlet located along the side of the tank within 21 inches of the outside corner of the tank.
- OPTIONAL PUMPING PORT: When used as a holding component, an 8-in. dia. optional pumping access port
  may be cast-in-place on the cover of the tank or incorporated into a vented manhole cover, with or without
  manhole riser. Warning label, locking device and min. 4-in. vent are as per code.

The department is in no way endorsing this product or any advertising, and is not responsible for any situation which may result from its use.

Sincerely,
